## MAIN ADVANTAGES

- › Much safer than using a classical sharp needle because DermaSculpt does not cut through vessels and tissues but rather navigates smoothly through the dermis and Sub-Q layer (depending on thickness and flexibility of microcannula used). The blunt end and flexibility of the microcannula allow for almost painless and non-traumatic procedure.
- › Through the fanning technique and due to the length of the microcannula, very few entry points are needed in order to treat the entire face.
- › The mechanical action of the DermaSculpt microcannula on the fibroblasts generate new collagen into the skin.

### Flexible Cannula

FLEXIBLE TO STIFF TO  
SUIT ALL NEEDS

### Blunt tip

DOES NOT CUT THROUGH  
NERVES OR VESSELS

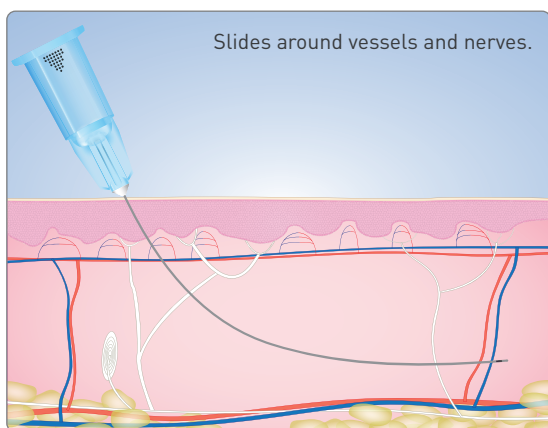

### Hub marking

FOR EXTRA PRECISION

## COMPARED TO USING A SHARP NEEDLE

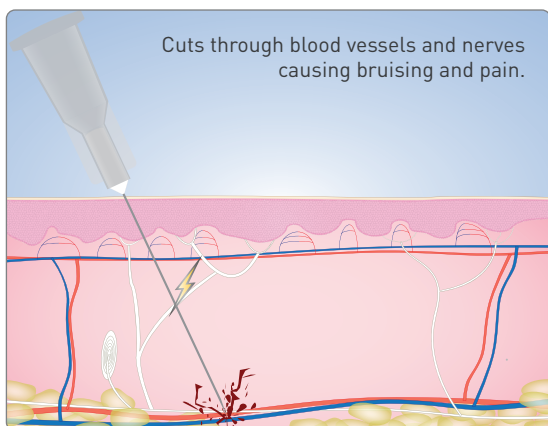

- ✓ Virtually no bruising
  - ✓ Considerably less pain
  - ✓ Minimal downtime
  - ✓ Stimulates new collagen production
- 
- ✗ No intravascular injection
  - ✗ Eliminating the risk of :  
Necrosis, blindness, and ophthalmoplegia.

DERMASCULPT  
WITH BLUNT TIP

VS

CLASSIC NEEDLE  
WITH SHARP TIP

For low concentration and viscosity,  
HA fillers, superficial injections

30G x 1" (25mm)

Tear trough, fine lines - precise work

For fillers of medium  
concentration and  
viscosity HA fillers

27G x 2" (50mm)

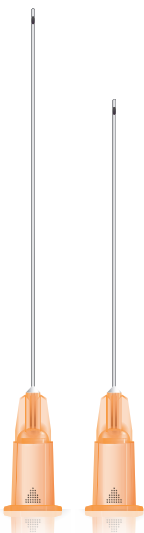

Extra length to cover  
larger treatment area

27G x 1 ½" (40mm)

Most versatile size, used  
for most facial indications

27G x 1" (25mm)

Precise work

For medium to thick HA and non  
HA fillers, median to deep  
injections

25G x 1½" (40mm)

Can be used for most  
facial indications

Extra length to cover larger  
treatment area

For viscous & highly concentrated fillers, injections deep into the skin to create volume

23G x 1½" (30mm)  
25G x 2" (50mm)

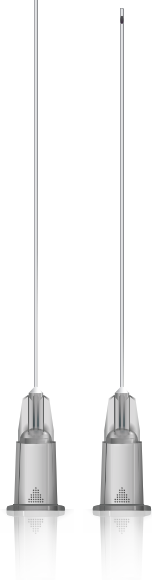

Precision for thick fillers

For viscous & highly concentrated fillers, injections deep into the skin to create volume

22G x 2¾" (70mm)  
Perfect for the hands

22G x 2" (50mm)  
Most versatile size for thick fillers

For facial fat graft  
(not recommended for fillers)

18G x 2¾" (70mm)

## REVIEWS / TESTIMONIALS

4.85 / 5 stars based on 200+ practitioners' reviews

### Ana Carolina, MD - Charlotte, NC

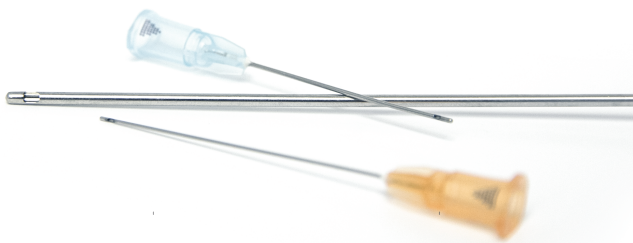

I have been using this product for over 2 years now and will not use any other brand! I only purchase from here, ease to use, excellent patient satisfaction!

### Adam Mauer, MD - Garden City, NY

Thank you! Your product changed my whole practice. Such an amazing device, what took the world so long and why was I slow in discovering it? Well, better late than never.

### Joel L. Cohen, MD - Denver, CO

I have found the Dermasculpt cannulas to be incredibly helpful in minimizing bruising and helping to achieve outstanding results in soft tissue augmentation of the cheeks, infra-orbital hollows, dorsal hands as well as the décolletage. Once you start using these cannulas, you totally get hooked. [...]
